EDUCATION

B.Tech (Computer Science Engineering), 2023 – 2027
Delhi Technological University, New Delhi | CGPA: 7.34

CBSE (Class XII), 2022
School of Excellence, Sec-17 Rohini, Delhi | 82.8%

CBSE (Class X), 2020
School of Excellence, Sec-17 Rohini, Delhi | 86.4%

EXPERIENCE

LakshX — AI/ML Engineer Intern — Jan – Apr 2026 | New Delhi
Early-stage startup building AI agents, automation, and analytics for SMBs — GitHub | Live | Python, DuckDB, sqlglot, Streamlit, pytest

- Built a hybrid Text-to-SQL and semantic-retrieval agent (Python, DuckDB) that lets non-SQL analysts **investigate network logs in plain English**.
- Designed a deterministic-first router that resolved **80% of queries with zero LLM calls** (LLM used only as a tie-breaker), cutting cost and latency.
- Added an AST-based SQL guardrail (sqlglot -> read-only DuckDB -> forced LIMIT) plus schema-catalog injection to block unsafe queries and hallucinated columns.
- Built a CI-gated eval harness: **14/14** injection/write/exfiltration attempts blocked, **100%** golden-set pass, **39/39** tests green.

PROJECTS

PaymentZ — P2P Payments Backend — GitHub | Live
Node.js, Express, MongoDB, React, Zod, JWT

- Built a P2P payments backend with **race-safe transfers**: an atomic conditional `findOneAndUpdate` inside a MongoDB multi-document transaction commits debit, credit, and ledger together or rolls back.
- Proved double-spend safety with a concurrency test (**10 parallel transfers**, funds for only 3 -> exactly 3 succeed); DB-enforced idempotency keys make retries safe.
- Hardened auth with bcrypt, pinned JWT claims, and timing-equalised login; Zod-validated every request; **35 unit tests** plus an E2E suite.

SplitrAI — Real-Time Expense Splitter — GitHub | Live
Next.js, React, Convex, Clerk

- Built a Splitwise-style expense tracker with equal/percentage/exact splits, **real-time balances** via Convex live subscriptions, and Clerk auth.
- Implemented a pairwise debt-netting ledger that collapses mutual debts per pair, with server-side validation ensuring splits reconcile to the total.

TECHNICAL SKILLS

Languages: C++ (primary), JavaScript, Python, SQL
Backend: Node.js, Express, MongoDB, Convex, REST APIs, JWT Auth, DuckDB
Frontend: React, Next.js, Tailwind CSS
AI / Data: RAG, Text-to-SQL, Vector Search, Pandas
Tools: Git, Docker, pytest, CI/CD (GitHub Actions), Zod
CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

ACHIEVEMENTS

- Solved **700+ DSA problems** primarily in C++ across LeetCode and GeeksforGeeks.
- **Dell Aspire Scholar** (Michael & Susan Dell Foundation) — selected for the inaugural **80-scholar** cohort across DTU and Hansraj College, DU.
- **NPTEL Elite + Topper (Top 2%)** — "The Joy of Computing using Python," **96%** among **20,403** certified, IIT Madras (Jul–Oct 2025).
